

DYNAMIC KEYNOTE SPEECHES

Challenge, Inform and Entertain your audience with Stan's lively blend of personal energy and timely information.

Topics

Copying Nature's Synergies

How $2+2=9$ if you're paying attention.

Using the latest research on the way Nature organizes successful communities, Stan brings the results of that research to light, with profound implications for our lives, our businesses and society as a whole. Stories and examples of ground-breaking companies illustrate.

Best for business and corporate groups

The Next Industrial Revolution is Here!

How Biomimicry is changing everything. Copying Nature's basic principles is creating jobs, savings and fortunes for those willing to listen. Technology is making it possible to model Nature, copying designs and implementing principles that are changing every aspect of our world.

Best for general audiences

Stan is a lifelong teacher and entertainer. He's an expert in alternative energy. He was chosen as Missouri Environmental Educator of the Year in 1995. As the Eco-Troubadour he has produced and performed thousands of assemblies and festival appearances over twenty three years. He is a two-time cancer survivor who now climbs 14 thousand foot mountains in Colorado.

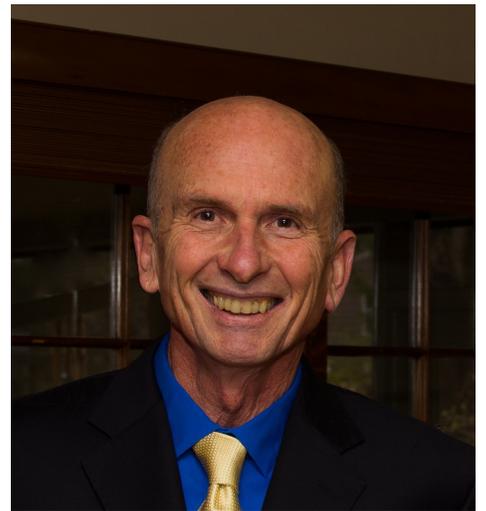

For groups from middle school to adult.

20-45 minutes Q&A sessions welcome.
